

"Your complete source for all of your plastic processing equipment."

	<p>North America's largest and fastest growing producer of auxiliary equipment for the plastics processing industry. Material handling and drying equipment, blenders, feeders, granulators, chillers and cooling towers, downstream extrusion components including saws, servo cutters and pullers. Markets include Injection Molding, Extrusion, Blow Molding, Packaging & Thermoforming.</p>
	<p>ENGEL manufactures injection molding machinery, from 30-6000 US tons, with all-electric, tie-bar-less, toggle and two-platen machines. Providing technology solutions for over 70 years, ENGEL offers an extensive selection of molding technologies. Every machine is backed with ENGEL technical know-how and highly trained factory service.</p>
	<p>ENGEL automation offers solutions that meet your specific automation requirements including a complete range of part handling robots to turnkey automation systems. ENGEL automation designs and delivers complete system solutions – from the injection molding machine and robot to the automation peripheral equipment – with all elements interacting in perfect harmony. You can rely on the highest part quality, stable processes and maximum productivity.</p>
	<p>Magnetic Mold Clamping & Quick Mold Change Systems for the injection molding, stamping and material handling industries.</p>
	<p>Market leader in turnkey recycling systems with patented infeed drum cutter technology, continuous laser and back flushing screen changers, vented extruders, hot face and automatic strand pelletizer systems.</p>
	<p>NBE offers material handling equipment and automated bulk material processing systems to discharge, store, convey, fill, mix, and weigh dry bulk materials in production and processing operations. Products include outdoor silos, gaylord tilters, surge bins, box dumpers, automatic bad break stations, supersack unloading equipment and auger feed systems.</p>
	<p>High performance Barrel and Screws, Valves, End Caps, Mixing Screws, Nozzles, Up-Size and Downsize and Special Design Screws. Now a part of the Reifenhäuser Group providing screws and barrels for extrusion.</p>
	<p>Fast Heat offers 1-180 zone integrated hot runner control with energy management, sensor protection and a continuous tuning control algorithm. Packaged with an easy-to-use <u>Industrial</u> control interface, a modular cabinet design and advanced features, including recipe storage, auto start, zone slaving, diagnostics, I/O communications and much more.</p>
	<p>Mold-Vac is a standalone system designed to eliminate molding problems caused as a result of gas and air entrapment. Exclusive to Mold-Vac design is its blowback control that cleans vented pins after every cycle. Mold-Vac provides precise microprocessor control for both vacuum and blowback timing functions.</p>
	<p>Global Leader in Dry Ice Systems for cleaning equipment and molds for Plastics and Rubber Industry. Reduces cleaning time by 70% as labor intensive cleaning AND the use of solvents and chemicals are no longer needed.</p>
	<p>Full line of Pneumatic, Servo, and Hybrid Robots, Sprue-Pickers, End-Of-Tooling and Custom Automation equipment.</p>
	<p>Providing part handling solutions since 1980 including part conveyors, automatic box filling systems, automatic parts sorting, portable cleanroom, inspection & work tables, custom systems as well as drum and gaylord covers and mold guide skirts.</p>
	<p>Drawer Magnets, Plate Magnets, Hopper Magnets, Magnetic Separation Conveyors, In-Line Magnets for Material Conveying Systems, Ferrous & Non-Ferrous Metal Separators</p>
	<p>Distributor of used equipment, pelletron dedusting systems and material piping. Our service division can service all auxiliary equipment and we offer Preventative Maintenance contracts, rebuilds of equipment and parts sales.</p>
