

"Your complete source for all of your plastic processing equipment."

	<p>North America's largest and fastest growing producer of auxiliary equipment for the plastics processing industry. Material handling and drying equipment, blenders, feeders, granulators, chillers and cooling towers, downstream extrusion components including saws, servo cutters and pullers. Markets include Injection Molding, Extrusion, Blow Molding, Packaging & Thermoforming.</p>
	<p>World's largest manufacturer of plastic injection molding machines including Mars: Servo-Hydraulic; Zeres: Multi-Component; Zeres: Electric; Venus: All-Electric; TAYU: Vertical Machines; Jupiter: Two-Platen</p>
	<p>Full service automation company including Full Servo Robots (3 & 5 Axis Top Entry Robots & 6 Axis Automation), FANUC Automation Integrations, Sprue Pickers, Downstream Automation, Conveyors, Guarding and Complete Machine Cells.</p>
	<p>Magnetic Mold Clamping & Quick Mold Change Systems for the injection molding, stamping and material handling industries.</p>
	<p>Market leader in turnkey recycling systems with patented infeed drym cutter technology, continuous laser and back flushing screen changers, vented extruders, hot face and automatic strand pelletizer systems.</p>
	<p>NBE offers material handling equipment and automated bulk material processing systems to discharge, store, convey, fill, mix, and weigh dry bulk materials in production and processing operations. Products include outdoor silos, gaylord tilters, surge bins, box dumpers, automatic bad break stations, supersack unloading equipment and auger feed systems.</p>
	<p>High performance front end componets for Injection Molding and Extrusion equipment including Barrel, Screws, Valves, End Caps, Mixing Screws, Nozzles, Up-Size & Downsize and Special Design Screws. Supplier to many Injection Molding machine manufacturer's, stocking programs available.</p>
	<p>Conveyors, Box Filling Systems, PET/Soft Drop Systems, Granulator Feed Conveyors, Extrusion Conveyors, Parts Separators, Parts Cooling Conveyors, Hopper Conveyors, Rotary & Stationary Work Tables, Tote Fill Systems, Air Conveyance Systems, and Custom Engineering</p>
	<p>Mold-Vac is a standalone system designed to eliminate molding problems caused as a result of gas and air entrapment. Exclusive to Mold-Vac design is its blowback control that cleans vented pins after every cycle. Mold-Vac provides precise microprocessor control for both vacuum and blowback timing functions.</p>
	<p>Global Leader in Dry Ice Systems for cleaning equipment and molds for the Plastics and Rubber Industry. Reduces cleaning time by 70% over labor intensive cleaning, eliminates the need for solvents and chemicals.</p>
	<p>Drawer Magnets, Plate Magnets, Hopper Magnets, Magnetic Separation Conveyors, In-Line Magnets for Material Conveying Systems, Ferrous & Non-Ferrous Metal Separators.</p>
	<p>Used Equipment, Parts/Components, Training, Installation, and Service Company. Our service division can service all auxiliary equipment and we offer Preventative Maintenance contracts, rebuilds of equipment and parts sales. Turnkey Material Handling and Water Installations.</p>
